Product

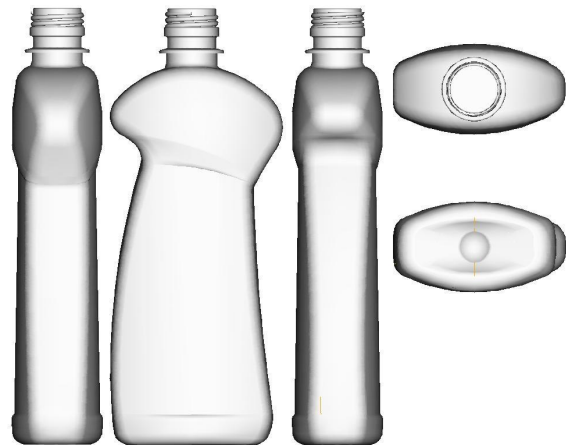

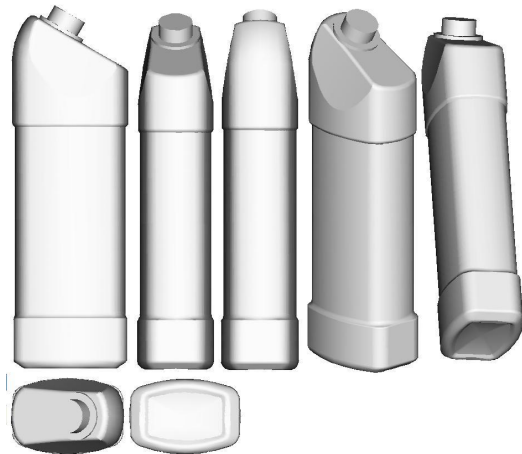

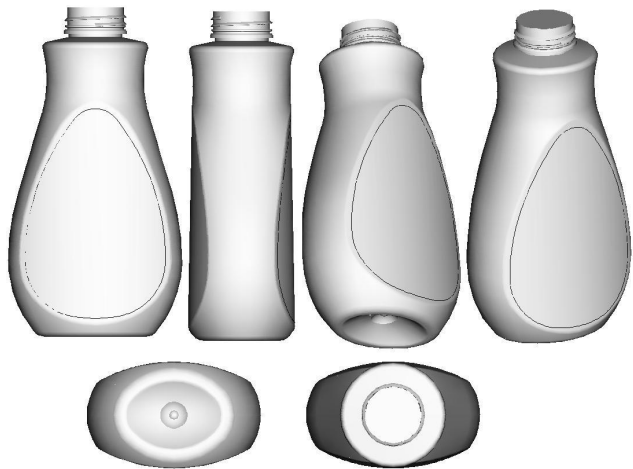

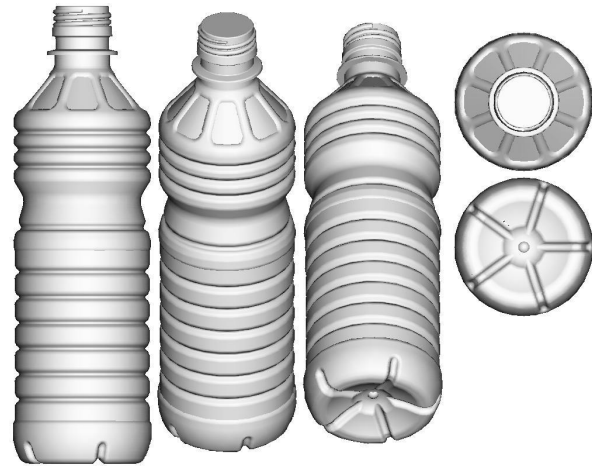

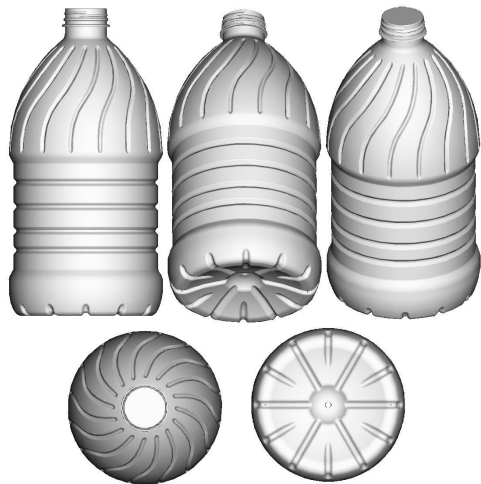

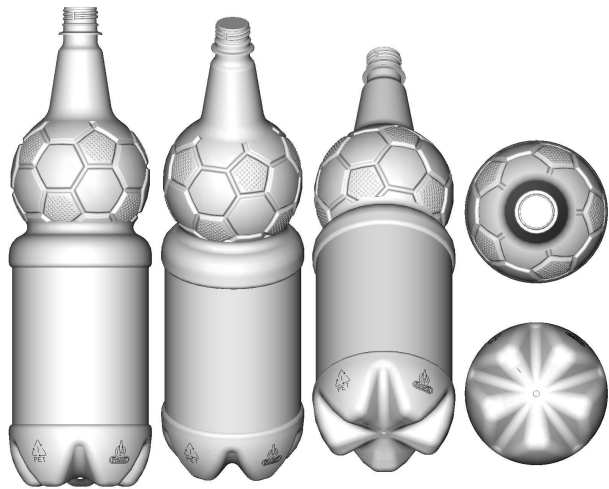

Design

Product and mold design.
Preparation of technical
documentation for manufacturing

Finished Product

Plastic blowing and
finished product
achievement

Services

Mold Technology offers services like maintenance, modernization and adaptation of technological lines

- Adaptations for bottling, capping, labeling and packaging lines
- Manufacturing of infeed worms, timing screws, star wheels, guides and other components
- Molds maintenance and repairs

Why Mold Technology?

**High quality
products and
services.**

**Precision in
product
manufacture.**

**Promptness and
short delivery
times.**
